Architectural Bronze

Musket Brown

English Red

Window Forest Green

Castle Gray

Dark Charcoal

Harbor Blue

Mystic Blue

## Reduced Heat Buildup

Due to the use of reflective pigments our coatings offer increased heat reflection, which significantly reduces the heat buildup of the painted PVC surfaces. This makes the use of our product ideal for various, extreme climate zones across the globe. Zowo-plast® is currently used in 56 countries.

## Extreme Elasticity and Adhesion

There are no other products you can twist and turn like Zowo-plast® without damaging the surface. After heating the coated substrate to a temperature of 180° Fahrenheit, you can twist the PVC without losing any adhesion or experiencing any peeling of the coat. The Zowo-plast® coat remains completely intact.

< Substrate with Zowo-plast® coating heated and twisted at 180° Fahrenheit.

## Your Advantages

- ISO 9001 & 14001 certified
- 15 year warranty
- Unlimited colors
- High scratch resistance
- Superior hardness
- Early & extreme adhesion
- Reduced heat buildup
- High abrasion resistance
- Extreme elasticity
- Self levelling
- One coat only
- Ultra low VOC content
- Any application method
- Water based

## Special Qualities

**Superior  
Hardness**

**Reduced  
Heat Buildup**

**Extreme  
Adhesion**

**High  
Elasticity**

**Water Based**

**Green**
